 New Orleans, Louisiana
  
- Percutaneous Spinal Cord Stimulator Implant for Pain Physicians, Part 1 and 2 2020  
 Grand Rounds  
 LSU Pain Medicine Fellowship Training Program  
 New Orleans, Louisiana

2013-present

## Medical Students Trained:

*The number of third- and fourth-year medical students who have rotated with me in my status as a resident is approximately 20 per year, usually for two- to four-week periods. The majority are LSU students, although I have approximately 5 visiting students per year. There are also first- and second-year students who interact with me through observation or through workshops I have organized for medical-student interest groups, the formation of which I guided. Overall, I would estimate that I have worked with approximately 200 graduated medical students on a personal basis.*
